

IP voice and collaboration solutions that will forever change the way you do business!

Mobilize your Business

We believe that today's businesses are looking for a provider that can deliver on the promise of a true Unified Communications solution. This is our advantage. Welcome to a world of voice-enabled software apps, powerful data and reporting tools, and go-anywhere mobility, to integrate the devices and systems your company already uses. This is UCaaS that leverages the power of smart phones, fixed phones, softphones or tablet devices with just one number, one dial plan, plus a unified set of calling and contact center features across all devices. We deliver the ability to integrate your business contacts, call histories and voicemail from any device anywhere in the world. Need to call a customer back while in Europe? Just use the app to call back stateside for free from your business line.

Record your calls

Improve sales, customer service, reduce liability and protect your business with our hosted Call Recording! You can record calls from your office phones or mobile phones; easily save them, categorize them, store them, email them and replay them. Uses standard MP-3 files. Records in the Cloud, giving your mobile workers the same capability as your office team!

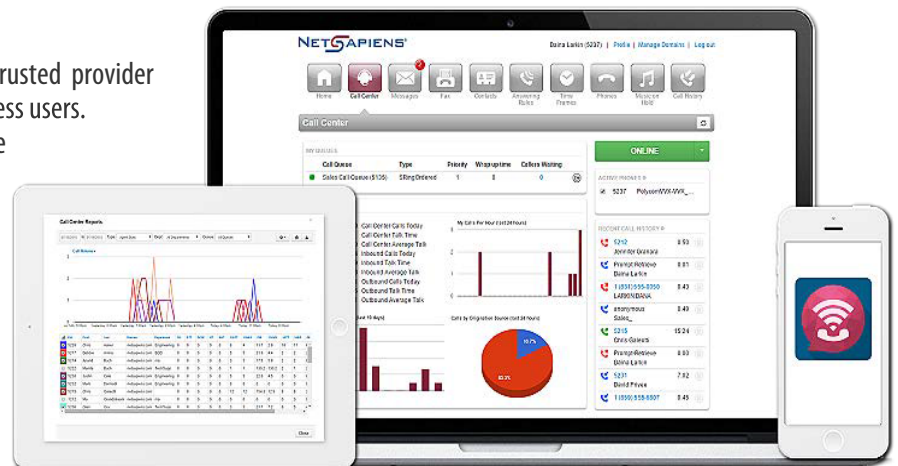

Enhance your visibility and gain data

Our portal provides access to data and reporting that will help your business stay efficient. Now even SMBs can have reports and statistics to show how effective their internal call handling is. You can save time on customer interactions with screen pops, and be able to detail out how each of your call handling employees is performing. Information is the key to improving, and this system gives it to you

Revolutionize your business

From small businesses to large enterprises, we have become the trusted provider of the new standard of Unified Communications for today's business users. Our system is reliable and simple, yet so packed with cutting-edge features that customers are saying we are revolutionizing their use of communications processes!

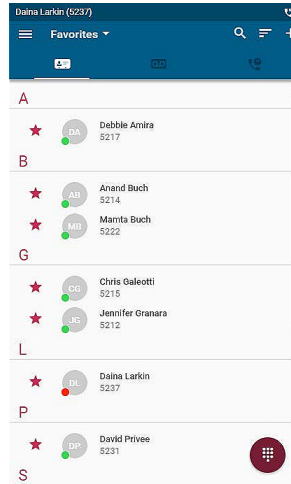

Whether you have a multi-location operation scattered across the globe or 10 to 1,000+ employees under the same roof, we provide the most flexible, future-proof UC solution on the market.

Here are just a few of our powerful features...

Easy-to-use desktop tools

Get instant access to your most used calling features in a native web app. Access feature settings to easily control your answering rules. Manage routing, remote office, and visual voicemail from anywhere and on any device. For office managers and admins, the customers' portal provides full-featured access to control features such as Auto Attendants, Call Queues and Time Schedules.

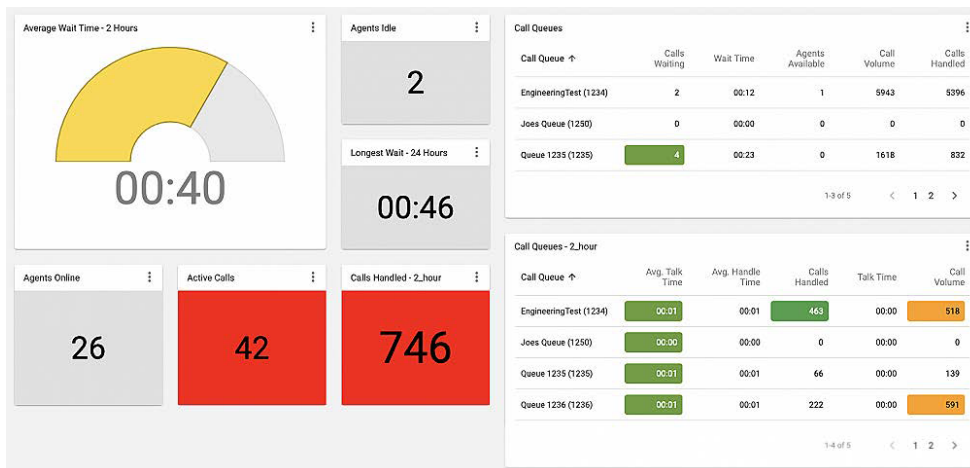

Auto Attendant & Custom Call Routing

With every implementation, we customize the call routing to fit your company needs. Time of Day settings ring departments as needed, based on whether you are in operation or closed. Auto Attendants can be set in a tiered-level system to route calls by extension dialing, name dialing, IVR and transferring with a prompt.

Advance your business with the ACD feature

Our Call Queue is not simply the Hunt Group that you knew in the past. The advanced Call Queue in our solution allows even small to medium businesses to improve the experience of their customers on incoming calls, as well as gain valuable reporting metrics on how your team is performing.
